

JAN 31 2005

RSA Security Protective Technologies, LLC
1573 Mimosa Court
Upland, California 91784

Attention: Mr. Rick Adler

Dear Mr. Adler:

Based upon your request, a technical representative of the Department of State (DOS) witnessed the vehicle crash test at Pennsylvania Transportation Institute in State College, PA on November 15, 2004 and has since evaluated the PTI Test Report 2005-04. The RSA/K&C Anti-ram Foundation Bollard Pad has been determined to meet the DOS certification criteria for passive vehicle barriers.

Under the provisions of SD-STD-02.01, Revision A, *Test Method for Vehicle Crash Testing of Perimeter Barriers and Gates*, dated March 2003, the RSA/K&C Bollard Pad is hereby certified as a K4 passive barrier.

The RSA/K&C Bollard Pad will be placed on the DOS list of certified equipment that is available for use by architects and planners. Your product still has to compete with other bidding manufacturers who are certified with the same classification. We cannot guarantee that your product will be chosen by architects that design the facilities.

Thank you for your interest and endeavors in protecting our personnel and facilities overseas.

Sincerely yours,

A handwritten signature in cursive script, appearing to read "Deborah P. Glass".
